## SCIENTIFIC AMERICAN

reaches over 9 million forward-thinking, solution-seeking readers who set agendas that others follow. They are the people that lead, deliver policy, and drive innovation across a variety of sectors including health and medicine, energy, infrastructure and planet management.

*Scientific American* documents advances and new technologies that enhance human lives and fuel economic growth. With a roster of over 150 Nobel laureate authors and a prestigious Board of Advisors contributing to the brand, *Scientific American* delivers in-depth, reliable, and credible information to spark imagination and serve as a catalyst for innovation.

Our clients have the ability to reach this engaged, educated, and influential audience through a range of dynamic and highly customizable platforms. Moreover, *Scientific American's* Custom Media Group serves as a one-stop shop for all content and distribution needs. Our media team creates content in many forms: features, info-graphic displays, special editions, digital programs, multimedia units, stand-alone websites, mobile applications, event programs, live content and social media collaborations.

We work closely with each of our clients to build solutions based on a deep understanding of their campaign objectives and their marketing goals.

***Our aim is to ensure we deliver your message to the right people in the right format at the right time.***

<b>1/3 Vertical:</b> 3 x 11	<b>1/3 Vertical:</b> 76 x 279

## PDF/X-1A

### COMPLIANT FILES (PREFERRED)

- Files must be pre-flighted before submission to *Scientific American*, especially overprint settings. Any PDF that does not pass our inspection will be rejected and must then be resupplied by the advertiser.
- Files should not include screening parameters or dot shape.
- Only compression compliant with PDF/x-1a standards accepted.
- Safety: live matter should be .25" in from trim on all sides.
- No RGB, LAB or embedded color profiles (i.e. ICC profiles).
- Offset crop and registration marks by 13 pts.
- 100% black-only elements should be set to overprint.
- Do not set white to overprint.
- Four-color solids must not exceed SWOP total tonal density of 300%.

## BEFORE CREATING PDF, CHECK YOUR NATIVE APPS FOR THE FOLLOWING:

- All layered native files must be flattened.
- Create document to trim size and extend bleed at least 1/8" beyond page edge

### Fonts

- Do not apply style attributes to basic fonts in layout program
- Postscript Type 1 & OpenType accepted.
- No Multiple Master or TrueType fonts.

### Color

- All color in layout application must be set to CMYK, (unless printing a spot or 5th color)
- RGB & Pantone colors must be converted to CMYK.

### Art

- TIFF or EPS only

- All art/scans must be CMYK, Grayscale or Bitmap. (No JPEG, GIF, or other method of compression)
  - 300 DPI (dots per inch) for continuous tone
  - 1200 DPI for linework
  - Four-color solids must not exceed SWOP total tonal density of 300%
  - All traps must be set to Knockout or None
- File naming**
- Keep file names less than 16 characters in length
  - Letters, numbers, and underscores are OK
  - Avoid special characters like @, !, #, &, etc.

## ACCEPTABLE MEDIA

### (MAC PLATFORM)

- CD-ROM or DVD
- Supply media with a printed list of disk contents and provide address if return of media is required

## ELECTRONIC RECEIPT CAPABILITIES

### For advertisers sending in print Ads.:

**Host** - <http://eagleray.nature.com/index.php>  
**User ID** - sciamprint  
**Password** - sciamads  
(all words are case-sensitive)
